

- Source code: <https://github.com/immarianaas/pa-23/tree/master/assignment-3>
- Which language did you use?
 - Python
- What guarantees can you give your users?
 - Nice arrows, nothing is formally tested
- What are you most proud of?
 - Uhm
 - Seeing the data structure with the computed dependencies, and getting the dependencies right is fun
- What did you learn over the last three assignments?
 - RegEx101 is a great website
 - Building everything from scratch takes a lot of time
 - Analyzing code after most "human errors" have been removed is a lot easier, also analyzing code parsed into a tree structure is a lot easier
